AMETEK POWERLease

AMETEK POWERLease was established to provide lease financing to companies who are acquiring AMETEK Power Instruments products for use in the United States of America. You've read about what leasing can do for your company. You've learned that AMETEK POWERLease offers flexible leasing programs with competitive cost.

WHY AMETEK POWERLease?

To save money and stay on top, that's why.

In order to meet your technology requirements, you are faced with three options for acquiring the assets:

- Paying cash
- Utilizing bank financing
- Leasing

Paying Cash:

Paying cash depletes capital reserves and, therefore, limits capital allocations for more strategic investments such as a corporate acquisition or a new advertising campaign.

Bank Financing:

Bank financing lets you keep your cash, but still leaves you vulnerable to ending up with outdated technology. Banks may also impose additional requirements or other covenants that tie your financial hands.

Leasing:

Leasing can free up your capital for more important goals. In addition to improved cash flow, leasing allows you to pick the very latest technology. At AMETEK POWERLease, you can keep pace with changing technology through our flexible lease structures and upgrade options tailored to grow as your company expands. When leasing your instrument, monthly payments can be deducted from taxable income.

Leasing may also provide the following additional advantages:

- Off-balance sheet financing
- Fixed-rate financing
- Fully expensed payments

Why lease with us?

Why lease with us?

AMETEK POWERLease is committed to your leasing requirements.

- We've made the process easy for you
- We'll close quickly for you

AMETEK POWERLease Options

There are three end-of-term purchase options: Monthly Lease - Fair Market Value Purchase Option, 20% Buyout Option, and \$1 Buyout Option.

Fair Market Value (FMV) Purchase Option:

- This program enables you to lease the instrument on a monthly basis or a 12 month program.
- One locked-in monthly payment covers this conventional lease throughout the program. Choose to extend, trade-in, or return your instrument at the end of the lease term.
- At the end of the lease, you may purchase the leased property at its current fair market value or simply return it.
- This program has the lowest monthly payments, which may help in meeting your operating budget.

In some cases, this lease structure may also offer tax and accounting advantages as payments maybe considered an operating expense and neither the capital asset nor the related liability are reflected on your balance sheet. Your tax advisor should be consulted for specific recommendations.

20% Buyout Option:

This program is best if you want lower monthly payments and at the end of the lease term, you want to purchase the leased property. The buyout cost at the end of the 12 month lease is only 20% the original price of the instrument. You also have the option to return the instrument.

\$1 Buyout Option:

The monthly payments associated with this program are similar to a loan that is fully amortized through a schedule of equal payment amounts. At the end of the 12 month lease term, you pay a nominal amount of \$1 to purchase the leased property.
